

“Gloria is quick, smart and intuitive with lots of energy. She was able to move the FIS knowledge management and documentation arm from 3 separate regional geographies to start working as one global entity. This required patience, focus and integrative work with the various cultures and management styles across the organization. I highly recommend her to anyone requiring a person to direct a project through change or to help in initiation or interim projects.”

- *Moshe Shamir, VP Marketing, FIS Software*
